Este artículo te guiará sobre cómo planificar y ejecutar un proyecto de energía solar, aprovechando las ventajas de generar tu propia energía y comercializar el excedente. ...

The USB ports on most solar chargers only offer the basic, slow charge. Something like the switch will like a USB-C PD car charger way more. It depends on location, but the usual factor is 5. You get 5 Wh per day and panel watt on a sunny day. It is possible to push this up a bit by turning the panel into the sun several times during the day.

For the solar panel adapter cables, keep in mind that the cable with the red o-ring is the positive. Connect the solar panel adapter cable and solar panel adapter cable extension together on the negative side. Connect the other side of that extension cable to the negative input (-) on the charge controller.
