

Where does energy come from in Azerbaijan?

Two-thirds of energy in Azerbaijan comes from fossil gas and almost a third from oil. Azerbaijan is a major producer of oil and gas, much of which is exported. Most electricity is generated by gas-fired power plants.

What is the power generation capacity of Azerbaijan?

The total power generation capacity of Azerbaijan is 8320.8 MW, the capacity of the power plants on renewable energy sources, including large HPPs is 1687.8 MW, which is 20.3 % of the total capacity.

How does Azerbaijan reduce emissions?

Azerbaijan aims to reduce its emissions by reducing gas leaks and reducing flaring. In 1847, Azerbaijan became the site of the world's first industrially drilled oil well. By 1899, Azerbaijan produced half of the volume of the world's oil.

What is the potential of wind energy in Azerbaijan?

According to preliminary analysis, the total technical potential of wind energy in the Azerbaijani part of the Caspian Sea was estimated at 157 GW (35 GW in shallow water basins and 122 GW in deep water basins).

What is Azerbaijan's energy security policy?

One of the main goals of the energy security policy implemented under the leadership of the President of the Republic of Azerbaijan Mr. Ilham Aliyev is to strengthen the use of renewable energy sources in the country.

Where does Azerbaijan rank in energy architecture?

According to the World Energy Trilemma Index, compiled by the World Energy Council for 2017, Azerbaijan has taken the 31st place (BBA) among 125 countries. According to the Global Energy Architecture Performance Index report 2017, compiled by the World Economic Forum, Azerbaijan ranked 36th out of 127 countries with a 0.67 score.
