

Mt solar container motor disassembly and assembly

<div class="df_qntext">What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

<div class="df_qntext">How many installers does a solarcontainer need?

At least 3-4 installers and 1 crane operator are needed to put the Solarcontainer into operation within one day. How many households can one Solarcontainer supply with electricity?

<div class="df_qntext">How to dismantle a motor?

Always remember these points, when you are starting to dismantling of a motor. 1. First of all, remove the pulley of motor on the shaft, also remove the fan cover and then Why is Earthing Necessary open the fan, which is screwed on the shaft of motor for cooling purpose. How Does Earthing Give 2.

<div class="df_qntext">How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

<div class="df_qntext">How to open a motor cover?

Open the nut-bolts or screws of the end-covers of the motor by using spanner or screw Components / Parts of driver. 4. Two screw drivers are inserted in motor cover and apply a little pressure internally as a result, the cover of the motor is easily opened. Comparison of HRC Fuse and Intermediate Switch 5.

As usual, my buddy and I were turning wrenches on a Saturday night (so fun!). This time we filmed it and I made a 28:33 1080p video that I uploaded to .
