

Solar container boiler quotation

<div class="df_qntext">What is a solar water heater?

A solar water heater is an innovative water heating technology that heats water using sunlight rather than gas or electricity. It is made up of solar collectors that heat the water in an insulated tank by absorbing solar radiation.

<div class="df_qntext">What is a commercial solar water heater?

A commercial solar water heater is a system that uses solar energy to heat water for large-scale applications, such as hotels, hospitals, industries, and institutions. Racold solar water heaters are widely used across Residential, Hospitality, Medical & Healthcare, Educational Institutes, and Industrial Sectors.

<div class="df_qntext">Why should you buy a Racold solar water heater?

Racold is a leader in solar water heating solutions, offering high-performance solar geysers designed for efficiency, durability, and long-term savings. Our products ensure maximum energy utilization, helping you reduce electricity bills while enjoying a seamless hot water experience. Explore and buy Racold's solar water heaters online today!

<div class="df_qntext">How much energy does a solar water heater save?

For example, a 100-litre-per-day solar heater can save up to 1,500 units of electricity annually, depending on usage. It also reduces CO2 emissions by saving around 140 litres of diesel. Solar water heaters are ideal in areas with power cuts, as they store hot water for on-demand use.

<div class="df_qntext">Why should you choose a solar hot water system?

Reliable Hot Water Supply: They provide a consistent source of hot water during sunny days, and some systems have backup heaters to ensure hot water even on cloudy days. **Low Operating Costs:** After the initial setup, the operating costs are very low since sunlight is free, unlike gas or electricity.

<div class="df_qntext">How do I choose a solar collector?

Capacity: Choose a model that suits your household size. 100L to 500L options are available, and larger models are available for commercial use. **Solar Collector Type:** FPC models are ideal for urban areas, while ETC models work better in colder regions with lower sunlight.
