<div class="df_qntext">Will the solar market slow down in 2022?

In 2021, the country reached nearly 12 GW of cumulative installed solar capacity, and the market doesn't show signs of slowing down. In 2022, this number is expected to jump to around 17 GW. To achieve this, however, the sector still has important hurdles to overcome related to grid congestion and business models in the post-subsidy era.
