Another key name so far in Panaman solar is Enel, who currently runs the up-and-running 12MW Chiriqui plant in the country's west and a larger 42MW batch nearer the Panama Canal.

The on-grid inverter is the core part, which converts the direct current generated by the solar panel into pure alternating current to match the main grid of the city. Finally, the two-way meter transfers photovoltaic energy that has just been converted to AC to the household load (electrical appliance) again.

To connect solar panels to the grid, you need to install a bi-directional meter on your home. This allows energy produced by your solar panels to be fed into the grid when you're not using it, and for you to draw energy back from the grid when you need it. It's essential that a licensed electrician performs the connection to ensure safety ...

Solar panel grid Panama

With these two additions, Enel Panama now has approximately 162 MWdc of installed solar capacity across 11 plants in the country. Its parent company says these solar farms can supply more than 44,200 homes annually. In 2023, Enel's solar parks connected to the Panamanian system injected more than 91,600 MWh per year into the grid.
